

Rossview Road Widening

Project Description:

This project proposes improvements to approximately 3.12 miles along Rossview Road. The majority of the widening will be made into a 5 lane curb and gutter section with 12 foot lanes, a 10 foot multi-use path on the South side, and a 5 foot sidewalk on the North side. The project limits will be east of International Boulevard to east of Kirkwood Road, just past the new entrance to the Kirkwood School campus that is being constructed. Construction is scheduled to begin around early 2025 and finish late 2026 to early 2027.
