

Bid – Medical Supplies and Pharmaceuticals
Addendum #1 – dated Sept 3, 2026

- 1. Do you currently have vending machines in place? How many?**
We currently have three. CAP 5, CAP 3 and Clear vision adjustable lockers. All located at our admin office.
- 2. We cannot hold pricing firm for 3 years, will you allow manufacturer price changes at any time during the 3 year contract?**
We understand pricing changes with manufacturer increases. All we ask is that we are provided with information prior to the increase (if possible) to allow us time to consider a suitable, less expensive alternative.
- 3. Kindly specify the award type (All or None, Group by Group, Line Item) for the bid.**
While we prefer to maintain continuity with one vendor, we understand that some items may have to be outsourced. Our goal is to minimize that process by having an “all inclusive” vendor, that is available to handle all aspects of our account.
- 4. We have an on line catalog will that work for this section? We do not have a ‘price list’ if you create an on line user and password and have an account with us you can see pricing will that be sufficient for this section?**
We cannot search for product pricing during the bid phase. We will need some sort of listing to review and compare with other bidders.
- 5. Where is the list of items that we should be pricing out? There is a list of products in the packet but no where to enter pricing and product information do you have an excel or something we should be filling in pricing on ?**
See attached.
- 6. Are you able to provide the estimated annual usage for each line item?** See attached. Usage is for fiscal year 2026, beginning July 1, 2025, and ending June 30, 2026.

7. **Would you consider an extension to the due date? This was already requested, but we wanted to submit all questions together.** We are unable to provide an extension at this time.
 - a. There are only 2 business days between the answers being posted and the bid opening date. See above
8. **Do you prefer the list of bid items and pricing be submitted via PDF, Excel, or both?** We have provided an excel sheet that can be used for pricing.
9. **Is there any excel sheet to fill the product information, Brand and the price list.** See attached sheet
10. **Can we bid only some products and not all as we do not supply all the products in the bid? The solicitation indicates that substitutions may be considered; however, many EMS products are specified to support existing clinical protocols, training, equipment compatibility, and operational standardization. Please identify any items for which substitutions will not be accepted and that must be quoted exactly as specified. For all other items, please confirm whether equivalent alternatives will be considered provided they meet or exceed the stated requirements.**

The two products of concern are the Onescope Pro Video Laryngoscope and the BD Intraosseous Vascular Access system. We have invested a lot of time, training and funding into these products. We are open to potential substitutions for these items but not at a substantial financial cost for our department, including the cost of training for our staff of 158.
11. **The solicitation states that samples for exceptions or substitutions must be included with the bid. Please clarify whether bidders are required to provide physical product samples for all proposed equivalent products, or whether manufacturer specifications, product literature, and documentation demonstrating equivalency will satisfy this requirement. If physical samples are required, please identify which categories of products require samples and whether samples are required at bid submission or only upon request during evaluation.**

Manufacturer specifications, product literature, and documentation demonstrating equivalency will satisfy this requirement. Single physical samples may be required for further evaluation before product is distributed for use on our medic units.
12. **Please clarify the County's expectations regarding integration between the inventory management platform and the awarded vendor's ordering system. Specifically, is the County expecting users to have real-time visibility into on-hand inventory, replenishment recommendations, order status, shipment status, back orders, and receiving activities within a single integrated solution?**

The electronic inventory segment is an integral part of our department. The ability to receive supply requests from our medic units, based off a state required unit inventory requirement, to our logistics staff being able to pull the supply request and resupply our unit, to our logistics division being able to conduct quarterly supply room inventory based off electronic inventory levels, to placing an order online and being able to see the status of the order, i.e. ordered, backordered, shipped, fulfilled. We have 25 medic units and 10 support vehicles that carry medical supplies. They all order via electronic inventory and ALL orders to our medical vendor are via electronic inventory. To be effective, it is imperative we understand the status of our orders when placed, to include the ability to go to the vendor's website and log in to an account and see the availability of an item.

- 13. The bid requires the vendor to be able to process Class 2 and 4 Schedule Drug orders and includes requirements for pharmaceutical dispensing, inventory tracking, and expired drug notifications. However, it does not specifically reference CSOS ordering, electronic DEA controlled substance ordering, narcotic vault management, perpetual controlled substance inventory reconciliation, or chain-of-custody reporting?**

Narcotics ordering can be handled within our department whether it be CSOS, Electronic or paper 222 form. We currently have our own narcotics tracking management as it coincides with DEA guidelines.

MONTGOMERY COUNTY EMS
