MONTGOMERY COUNTY
TENNESSEE
HIGHWAY DEPARTMENT

Full Depth Reclamation of Ironhorse Way
Addendum #2 – Dated September 29, 2026

1. **What procedures does Montgomery County recommend or require for allowing homeowners access to their driveways?** Previously, rubber curb ramps have been used. Or if possible, ask residents to park on other streets close by.
2. **What are the limitations for dust control? If none specific, are there any preferred methods of spreading cement that Montgomery County suggests?** Do your best to minimize dust.
3. **Is there a minimum allowed cross slope?** Preferred 3% crown. No less than 2%
4. **Will Montgomery County notify residents of the anticipated work schedule, or is the contractor responsible for notifying the residents? If the contractor is responsible, how much notice is required before driveway access is temporarily restricted, and what access must be maintained during active FDR operations?** Contractor is responsible. Prefer at least 72 hour notice.
5. **Could you please confirm which bid bond form we are required to complete for this bid packet? I want to make sure we are using the correct form and submitting all required documentation.** All requirements are listed in the bid package that was emailed out.
